

WESLEY LAU

Education

BACHELOR OF SCIENCE IN ENGINEERING – Drexel University – Bourbonnais, IL
Majors: Electrical Engineering

Jun 2016

Certification

GOOGLE ADVANCED DATA ANALYTICS SPECIALIZATION

Credential ID: 2FA6R2B257GJ

Mar 2024

QLIK SENSE DATA ARCHITECT-V3

Credential ID: QSDA0368v3

Sept 2017

Technical Skills

Python

pandas, dbt, matplotlib, PySpark, SQLAlchemy, boto3

Database Management

Oracle, Postgres, SQL Server, MySQL

Data Visualization

Power BI, Tableau

AWS

S3, Athena, Glue, DynamoDB

Data Modeling

Erwin Data Modeler
Oracle SQL Developer Data Modeler

NoSQL

MongoDB, Neo4j, JSON, XML

Work Experience

DATA ENGINEER – National Cancer Institute – Bethesda, MD

Dec 2022 - Jan 2024

- Expanded existing data models to seamlessly integrate incoming Postgres data from legacy system.
- Validated data post-migration through comprehensive integrity checks and created scripts to resolve discrepancies, achieving 100% data accuracy.
- Optimized the Python data loader system by implementing multithreading and data caching techniques, increasing data loading speed and efficiency.
- Developed robust GraphQL APIs that enhanced accessibility to MongoDB datasets; improved user experience through faster data fetching times

DATA ANALYST – DHS HQ – Arlington, VA

May 2021 - May 2022

- Collaborated with SME and stakeholders to define data requirements and translated them into actionable items, which directly contributed toward developing more robust logical and physical models
- Engineered and executed a complex SQL query to aggregate data from centralized data repository, reducing report generation time by 60%.
- Monitored critical data quality metrics and enforced robust validation rules, implementing a comprehensive data governance standard that reduced errors in data migration by 30% through rigorous discrepancy identification.
- Built interactive dashboards in Tableau to monitor and validate data quality during and post-migration, enhancing issue detection speed and ensuring data accuracy.

DATA ANALYST – DHS FEMA – Washington D.C.

Aug 2018 – May 2021

- Designed data pipelines using PySpark to ingest and transform legacy data from Oracle and Postgres and load them into centralized AWS S3 data lake.
- Developed and implemented a complex AWS Athena query system to retrieve and process data from AWS S3 data lake, enabling faster insights for the data science team.
- Collaborated with stakeholders to create standardized data models and enforce consistency across relational databases (AWS Aurora, Oracle) and NoSQL stores (AWS S3, DynamoDB).
- Conducted in-depth data profiling and established rigorous quality checks, guaranteeing reliability for analytics workflows utilized by the data science team; enhanced accuracy metrics to 99% across machine learning models.

DATA ANALYST – Flagstar Bank – Detroit, MI

Oct 2017 – Mar 2018

- Developed and deployed an efficient custom ETL framework that parsed complex XML structures along with JSON datasets into MongoDB; streamlined data processing workflows, saving approximately 30 hours per month.
- Created comprehensive ER diagrams to support business requirements and improve communication between stakeholders and the technical team.
- Created interactive data visualizations for 230 non-technical employees, simplifying complex data sets and facilitating better decision-making; increased data comprehension and actionable insights across the organization.

DATA ANALYST – First Guarantee Mortgage Company – McLean, VA

Sept 2016 – Sept 2017

- Leveraged SQL, Python, and Qlik Sense to analyze 20TB of data and improved business decisions making.
- Designed a comprehensive data visualization dashboard leveraging Qlik Sense to convey complicated data sets to the business Analysts for improving customer's experience.
- Engineered a robust Talend ETL pipeline to seamlessly transfer large datasets from an Oracle database into MongoDB; increased data accessibility for business analysts by ensuring integration was completed within two hours daily.
